The PT-2410 creates professional, laminated, adhesive-backed labels that can be used for virtually any office application.

The PT-2410 labeling system uses 5 different "TZ" tape label widths that are available in a selection of many different color combinations. Each label adheres to practically any surface, withstands variations in temperature (from freezers to microwaves) and is water resistant. These laminated labels are ideal for identifying folders, computer disks, office equipment, computer hardware and more.
