Professional Stamp Creation

THE REVOLUTIONARY NEW SYSTEM IS THE FASTEST AND EASIEST WAY TO MAKE STAMPS... AND PROFITS!

- Perfect for starting your own business!
- Perfect for quick printers who wish to add “stamps on demand” service!
- Perfect for stamp factories who want to maximize “express service” in a minimum of floor space!

NO WAITING! NO MISTAKES!

- IT’S INSTANTANEOUS! Create a pre-inked stamp in just 3 minutes.
- IT’S A TRAFFIC BUILDER! On-demand capability means additional impulse stamp sales not possible today.
- IT’S ERROR-FREE! Proofread and delete errors right in your store.
- IT’S QUICK AND CLEAN! There’s no messy liquid inside... the Brother Stampcreator PRO™ is environmentally safe and clean.
- IT’S CREATIVE! Utilizes your existing PC, MAC, Fonts, Scanner, Clip Art and Digital Camera for high quality 600 dpi graphic stamps which have been difficult to make with conventional stamp equipment. Minimum space is required...all you need is two square feet beside your computer. No experience necessary...just 45 minutes playing with the dedicated stamp software will make you an expert.
- IT’S PROFITABLE! Lower wholesaler stamp cost plus the opportunity to charge more for express service and graphics capabilities with no extra cost.
Takes less than 3 minutes to make…
lasts a lifetime!

This exclusive commercial system creates a major profit center by turning signatures, graphics, text, clip art, photos and logos into pre-inked stamps...

...while your customers wait!

Everyone knows that stamps help people get through practically every job faster and easier, but no one ever plans ahead to buy a stamp. When your customers need one though, they need it now. And now you can give it to them… while they wait!

It’s just that fast and simple thanks to the Brother Stampcreator PRO™ With this innovative system, virtually anything you can put on a computer monitor, you can put on a custom designed, professional pre-inked stamp. Text, graphics, signatures, logos, clip art, photos...with Stampcreator PRO’s proprietary 600 dpi technology, anything is possible and everything is reproducible.

The Brother Stampcreator PRO™ is an ideal bonus profit opportunity for anyone in printing, stationery, mailing, copying, office equipment or other stamp-related businesses. And best of all, your virtually risk-free investment in a Stampcreator PRO™ can actually be recouped after only about 200 stamp sales. After that, everything will be clear profit. The Brother Stampcreator PRO™ is a totally new way to make stamps…and profit!

We’re at your side.

From beginner to expert in just 45 minutes!

This powerful and amazingly intuitive software package provides the tools to help you unleash your creativity on all kinds of stamps. It contains an easy to use library of clip art, animals, funny pictures, layouts, page formats, plus various graphic effects that can be used on the fonts. And for additional creative freedom, graphics from a scanner or digital camera can be imported for added professionalism. This technologically advanced software bundles everything you need to expand your flexibility, creativity...and profits.
Stamp Creation System

Takes less than 3 minutes to make... lasts a lifetime! 50,000 impressions ensure a virtually unlimited stamp life!

HOW TO MAKE A STAMP

Brother has developed and perfected a totally new and revolutionary way to impose images onto rubber stamp surfaces. After you create the image on your computer and insert the text, the rest of the process will take just a few minutes. Ink never touches your fingers...this dry process is absolutely clean and dry.

1
Start the Stamp Editor on your PC or MAC and then create any image you wish.

2
The Stumpreator PRO™ will instantly transfer the image you have prepared on your computer screen onto a transparent film, which will be loaded automatically from the magazine tray inside. 600 dpi thermal transfer printing will reproduce every detail from your graphics. Open the window and you will see the film (positive master) for your stamp positioned above the Xenon Flash Assembly.

3
Position a blank stamp in the stamp creation bay above the Xenon flash assembly.

4
When the door to the stamp creation bay is shut, the Xenon flash is automatically triggered.

5
The surface of the stamp is made of a light sensitive rubber material specially developed for the Brother Stumpreator PRO™. Light from the Xenon flash causes millions of micro-pores in the stamp surface to close. Only pores protected by the black printing on the positive master film will remain open.
